EMTEQ Offers LED Red Beacon Light for Embraer ERJ 145 with PMA

New Berlin, Wis., USA (April 2014) – EMTEQ’s LED Red Beacon Light replacement kit for the Embraer ERJ 145, part number EMB145-RBL-900, has received an approved PMA supplement from the FAA.

This kit contains an LED Red Beacon light, adapter plate, and harness allowing for a quick and easy, drop-in upgrade for both existing upper and lower beacons. This new light operates off 28VDC power and has a smaller aerodynamic profile than the existing xenon light. The LED replacement also significantly increases cycle count reducing maintenance requirements and long lead time spares issues.

This red beacon is currently used on Embraer production aircraft and is applicable for ERJ135 and ERJ140.
