EMTEQ Supports Flying Colours on Multiple Upgrade Programs

Completion and Upgrade Solutions for Various Aircraft Platforms

New Berlin, Wis., USA (September 2010) – EMTEQ has worked with Flying Colours Corporation by providing a wide range of solutions for completion and refurbishment of various aircraft platforms, including but not limited to Hawker Beechcraft, Bombardier and Dassault Falcon Jet aircraft, as well as Flying Colours' CRJ ExecLiner Conversion program.

More specifically, EMTEQ has provided a multitude of LED interior lighting products and engineering services in support of Flying Colours' Green Bombardier Challenger 850 program. A full LED lighting package of wash, reading, dome, marker and flexible accent lighting, as well as air gaspers, outlets and interior certification, have all been supplied by EMTEQ for these completions. ACS-NAI, EMTEQ's Canadian facility, offered local support and expertise in managing the certification for the projects.

"The relationship we have developed with EMTEQ on our green completion programs, CRJ ExecLiner conversions, and the countless refurbishment projects we have done together has been a win-win for both companies," stated Eric Gillespie, Flying Colours' Director of Completion Sales. "We are looking forward to growing this relationship further as we continue to grow our business and offer new services."

For almost a decade EMTEQ and Flying Colours have been working together, offering an increasing number of products and services to meet the unique needs of their customers.
